

LULE RIVER VALLEY

ARCTIC BATH

In wintertime frozen into the ice and during the summer floating on the river. Arctic Bath is inspired by the timber floating era, like a monument and a reminder about the importance of forests for the entire country's development. The circular shape of Arctic Bath creates a protected environment. The center of the bath is great for both sunbathing, arctic baths and for those who wish to experience the northern lights or starry skies in a harmonic setting. The cold bath experience is not for the faint hearted, it is a refreshing four-degree-Celcius bath. And with the combination of warm saunas and arctic spa it is a destination that focus on wellness. To complete your experience you can stay in one of the 6 floating hotel rooms. Arctic Bath will open up in Harads, Sweden.
