

The Faena Districts in Miami Beach and Buenos Aires are cultural epicenters that create a perfect balance between art, architecture, nature and technology, and have been conceived to enhance people's lives.

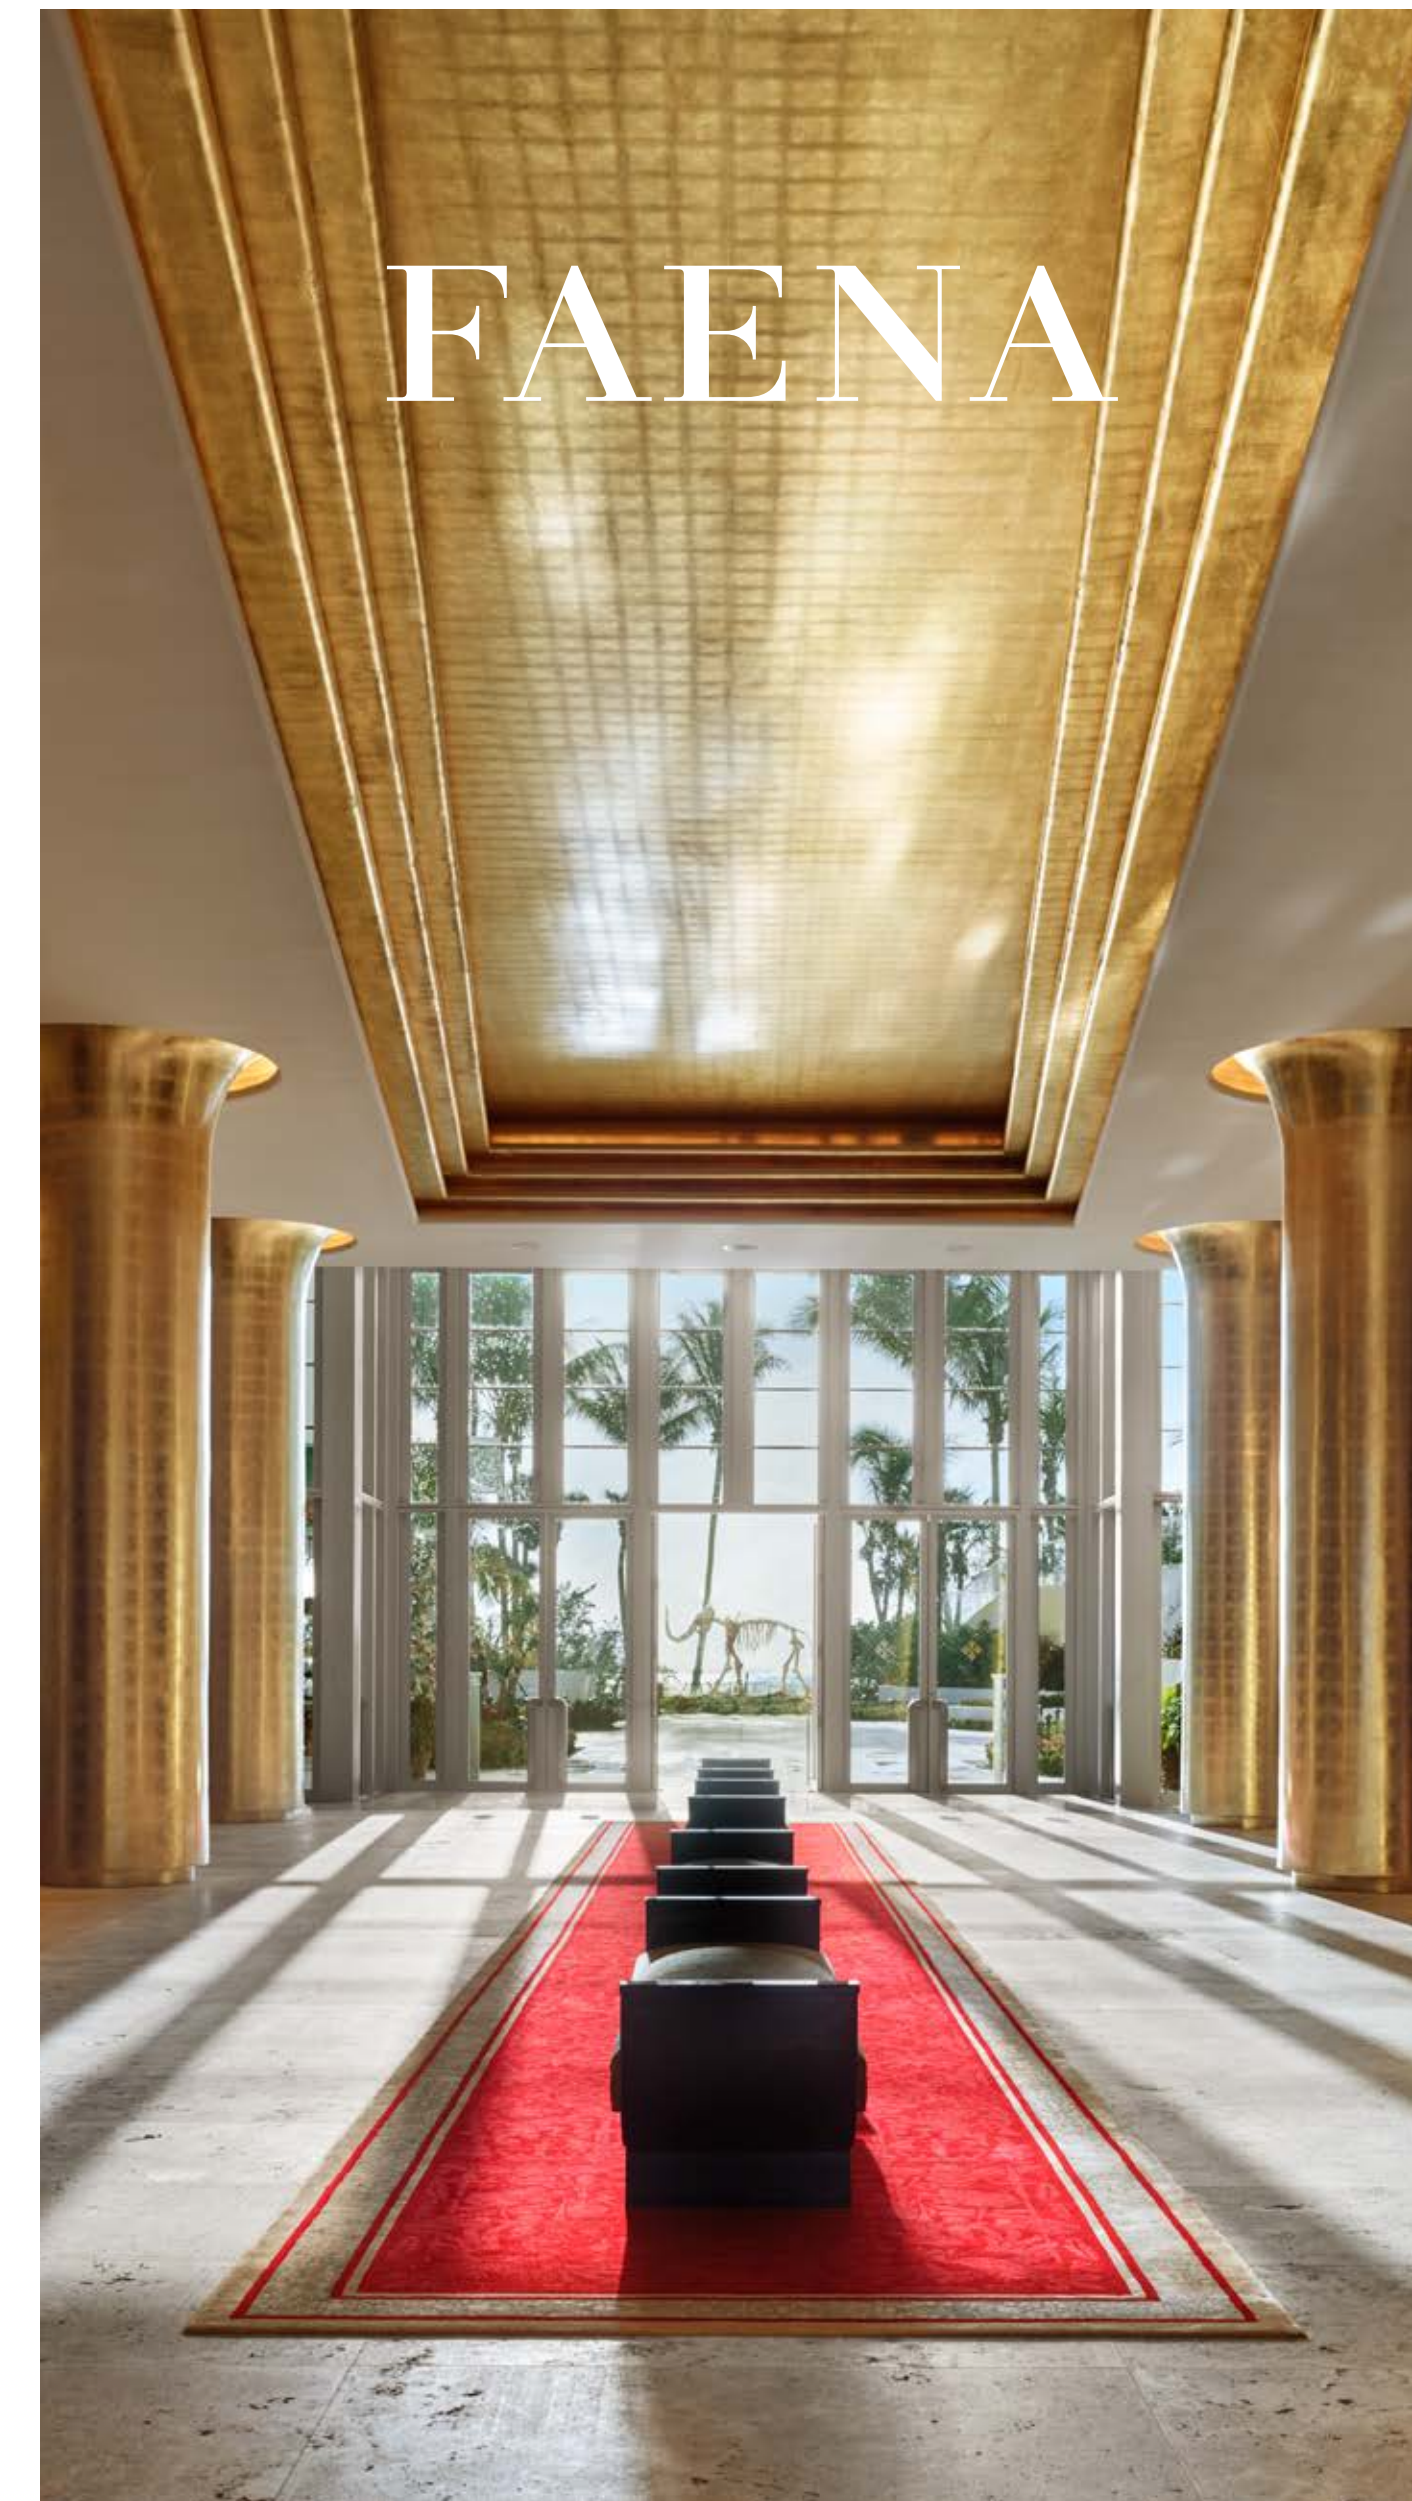

Acting as curators, we have commissioned a group of standout talents from around the world to create urban installations without equal—that inspire individual reflection and social interaction—that encourage a new appreciation for the beauty of the natural world. The interconnection between humanity and nature embodies our holistic southern vision.

In both locations we have created new cultural destinations that transform the ordinary into the extraordinary.
